High Pressure:

Listed below are the areas where minimum normal operating pressure is above 125 p.s.i.g. Due to the economic infeasibility of providing service at lower pressure, residents in this area are required to have individual pressure regulators. They are also required to maintain, repair or replace the individual regulators and will be liable for any and all damage to or loss of property resulting from a failure to keep the regulator in good working condition.

H1. The minimum normal operating pressure at Montepere Way (Tract 7798) is between 125-143 p.s.i.g. During periods of hourly minimum demand the pressure does not exceed 168 p.s.i.g. These connections were authorized through Advice Letter No. 188.

H2. The normal operating water pressure for 58 lots at the area along Regnart Road and Lindy Lane in the City of Cupertino is between 125 p.s.i.g. and 180 p.s.i.g. as authorized by Decision 94-06-030.

The areas listed on this page are depicted on the "Map of Areas with Special Pressure and Fire Flow Conditions".
