May 27, 2025

California Public Utilities Commission 505 Van Ness Avenue San Francisco, CA 94102

Advice Letter No. 616

San Jose Water Company (U-168-W) (SJWC) hereby transmits for filing the following changes in tariff schedules applicable to its service area and which are attached hereto:

Cal. P.U.C Sheet No.	Title of Sheet	Cancelling Cal. P.U.C. Sheet No.
2350-W	Schedule No. 1 – General Metered Service	2324-W
2351-W	Schedule No. 1B – General Metered Service with Automatic Fire Sprinkler System	2326-W
2352-W	Schedule No. 1C – General Metered Service with Mountain District	2329-W
2353-W	Schedule No. 4—Private Fire Service	2333-W
2354-W	Schedule No. RW –Raw Water Metered Service	2334-W
2355-W	Schedule No. RCW –Recycled Water Metered Service	2336-W
2356-W	Table of Contents	2348-W

With this advice letter, SJWC requests authorization to increase revenue by \$22,536,248 or 4.0% to offset the increases to purchased potable water charges, the ground water extraction fee, and purchased recycled water charges that will be implemented by SJWC's water wholesalers effective July 1, 2025.

These tariffs are submitted pursuant to General Orders (GO) No. 96-B Water Industry Rules 7.3.1(7) and 8.4. This advice letter is designated as a Tier I Advice Letter.

### Background

On May 16, 2024, SJWC filed Advice Letter (AL 609) to include in rates the increase in purchased water, pump tax, and recycled water costs from its wholesaler.

At its May 27, 2025 meeting, Valley Water's Board of Directors formally adopted water rate increases for the 2025-2026 fiscal year, raising the groundwater rate (pump tax) to \$2,450 per Acre Foot (AF) and the purchased water rate to \$2,565/AF effective July 1, 2025. The groundwater rate

ADVICE LETTER NO. 616 Page 2

will increase by \$221/AF from the July 1, 2024 rate of \$2,229/AF (AL 609) and the purchased water rate will increase by \$221/AF from the 2024 rate of \$2,344/AF (AL 609).

Valley Water's groundwater charge for agricultural increased from \$39.80/AF to \$43/AF which affects the agricultural discount provided by Valley Water and passed through in SJWC's tariffs. The discount will increase from 5.0257/ccf to 5.5257/ccf (2,450/AF - 43/AF = 2,407/AF = 5.5257/ccf).

The updates to purchased water rate, groundwater rate, and agrigultural discount are reflected in SJWC's tariff Schedule No.1- General Metered Service, Schedule No.1C - General Metered Service Mountain District, and Schedule No. RW - Raw Water Meter Service.

Changes to the rate for untreated water also affect the rate for purchased recycled water. South Bay Water Recycling, SJWC's wholesale recycled water provider, indexes recycled water wholesale rates to the rates charged by Valley Water for untreated water, with appropriate discounts for irrigation, industrial, or agricultural use. The recycled water discount remains at \$105 for irrigation, industrial, and agricultural uses. Effective July 1, 2025, wholesale recycled water rates will be increased by \$221 per AF from adopted July 1, 2024 rate of \$2,124 to \$2,345 per AF.

This updated to recycled water rate is reflected as Special Conditions in SJWC's tariff for Schedule No. RCW for Reycled Meter Water Rate.

Please see **Attachment A** for actual rate effective July 1, 2025. The following is a summary of total increase in costs:

Increase in Purchased Water	\$11,771,446
Increase in Ground Water Charge	\$10,049,125
Increase in Purchased Recycled Water	\$624,036
Increase in Taxes and Uncollectibles	\$91,641
Total Increase in Costs	\$22,536,248

Copies of detailed workpapers supporing the proposed rate increase and rate calculation have been provided to the Commission Staff in accordance with Standard Practice U-27-W.

Public notice of the offset rate adjustment will be completed by placing a notice (Attachment B) in the San Jose Mercury News as soon as possible. Proof of publication will be submitted to the Commission when the notification has been completed. In compliance with Paragraph 4.3 of General Order 96-B, a copy of this advice letter has been emailed to all interested and affected parties as detailed in SJWC's Service List.

ADVICE LETTER NO. 616 Page 3

### Effective Date

SJWC requests that the updated tariff sheets become effective July 1, 2025.

### Protests and Responses

Anyone may respond to or protest this advice letter. A response does not oppose the filing but presents information that may prove useful to the Commission in evaluating the advice letter. A protest objects to the advice letter in whole or in part and must set forth the specific grounds on which it is based. These grounds may include the following:

- (1) The utility did not properly serve or give notice of the advice letter;
- (2) The relief requested in the advice letter would violate statute or Commission order, or is not authorized by statute or Commission order on which the utility relies;
- (3) The analysis, calculations, or data in the advice letter contain material error or omissions;
- (4) The relief requested in the advice letter is pending before the Commission in a formal proceeding;
- (5) The relief requested in the advice letter requires consideration in a formal hearing, or is otherwise inappropriate for the advice letter process; or
- (6) The relief requested in the advice letter is unjust, unreasonable, or discriminatory (provided that such a protest may not be made where it would require relitigating a prior order of the Commission).

A response or protest must be made in writing or by electronic mail and must be received by the Water Division within 20 days of the date this advice letter is filed. The address for mailing or delivering a protest is:

Tariff Unit, Water Division, 3<sup>rd</sup> floor California Public Utilities Commission, 505 Van Ness Avenue San Francisco, CA 94102 water division@cpuc.ca.gov

On the same date the response or protest is submitted to the Water Division, the respondent or protestant shall send a copy of the protest by mail to us, addressed to:

Regulatory Affairs San Jose Water Company 110 West Taylor Street ADVICE LETTER NO. 616 Page 4

> San Jose, CA 95110 Fax 408.279.7934 regulatoryaffairs@sjwater.com.

The advice letter process does not provide for any responses, protests or comments, except for the utility's reply, after the 20-day comment period. Public notice is not required.

SJWC currently has Advice Letter 615 pending before the Commission. This filing will not cause the withdrawal of service, nor conflict with other schedules or rules.

Very truly yours,

NANCI TRAN Director of Regulatory Affairs

San Jose, California

For each	8-inch service		\$211.17	
For each	10-inch service		\$271.51	
For each	12-inch service		\$331.87	(I)

#### SPECIAL CONDITIONS

- 1. The fire protection service connection shall be installed by the utility and the cost paid by the applicant. Such payment shall not be subject to refund. The facilities paid for by the applicant shall be the sole property of the applicant.
- 2. If a distribution main of adequate size to serve a private fire protection system, in addition to all other normal service, does not exist in the street or alley adjacent to the premises to be served, then a service main from the nearest existing main of adquate capacity shall then be installed by the utility and the cost paid by applicant. Such payment shall not be subject to refund.
- 3. Service hereunder is for private fire protection systems to which no connections for other than fire protection purposes are allowed and which are regularly inspected by the underwriters having jurisdiction, are installed according to specifications of the utility, and are maintained to the satisfaction of the utility. The utility may install the standard detector type meter approved by the Board of Fire Underwriters for protection against theft, leakage or waste of water and the cost paid by the applicant. Such payment shall not be subject to refund.

### Schedule No. RCW

### **RECYCLE WATER METERED SERVICE**

#### APPLICABILITY

Applicable to all recycled water metered service.

#### TERRITORY

Portions of Cupertino, San Jose, and Santa Clara, and in Campbell, Los Gatos, Monte Sereno, and Saratoga and in contiguous territory in the County of Santa Clara.

#### RATE

#### **Quantity Rate:**

Currently effective quantity rate as reflected in "Schedule No. 1, General Metered Service" less the treated water surcharge currently added to potable deliveries from the Santa Clara Valley Water District and less any applicable discount from the South Bay Water Recycling Program.

#### Service Charges:

Currently effective monthly service charge for the applicable meter size as reflected in "Schedule No. 1, General Metered Service".

#### SPECIAL CONDITIONS

1. For the purpose of this tariff a well user is defined as a customer of the Santa Claray Valley Water District who procures his/her non-potable supply from an on-site well as of the first effective date of this tariff. This service charge for well users will be in accordance with the following schedule:

#### Service Charges

Meter Size	Per Meter Per Month
2-inch meter	\$49.15 (I)
3-inch meter	\$65.55
4-inch meter	\$73.73
6-inch meter	\$123.14
8-inch meter	\$147.50
10-inch meter	\$229.44 (I)

The monthly service charge will be changed in an amount equal to changes in the monthly service charge for similarly sized meters under "Schedule No. 1, General Metered Service". In addition to the service charge, such customers will be charged for the quantity of recycled water used at that site in the same amount billed to San Jose Water Company by the South Bay Water Recycling Program.

# SAN JOSE WATER COMPANY ADVICE LETTER NO. 616 ATTACHMENT A ACTUAL RATE

# **Staff Report**

In accordance with the District Act, District staff has prepared an annual report on the Protection and Augmentation of Water Supplies (PAWS), which was filed with the Clerk of the Board on February 28, 2025.

The Report is the 54<sup>th</sup> annual report on the Santa Clara Valley Water District's (Valley Water) activities in the protection and augmentation of the water supplies. This Report is prepared in accordance with the requirements of the District Act, section 26.5. The Report provides information on water requirements and water supply availability, and financial analysis of Valley Water's water utility system. The financial analysis includes future capital improvement and maintenance requirements, operating requirements, financing methods and staff's recommended groundwater production and other water charges by zone for fiscal year (FY) 2025-26.

The PAWS Report can be found at <u>www.valleywater.org</u>.

### The Rate Setting Process

According to Section 26.3 of the District Act, proceeds from groundwater production charges can be used for the following purposes:

- 1. Pay for construction, operation and maintenance of imported water facilities
- 2. Pay for imported water purchases
- 3. Pay for constructing, maintaining and operating facilities which will conserve or distribute water including facilities for groundwater recharge, surface distribution, and purification and treatment
- 4. Pay for debt incurred for purposes 1, 2 and 3.

This year, as in past years, staff has carefully evaluated the activities that can be paid for by groundwater production charges. The work of Valley Water is divided into projects. Every project has a detailed description including objectives, milestones, and an estimate of resources needed to deliver the project. To ensure compliance with the District Act, each project manager must justify whether or not groundwater production charges can be used to pay for the activities associated with their project. The financial analysis presented in the annual report is based on the financial forecasts for these vetted projects.

Resolution 99-21 guides staff in the development of the overall pricing structure based on principles established in 1971. The general approach is to charge the recipients of the various benefits for the benefits received. More specifically, pricing is structured to manage surface water, groundwater supplies and recycled water conjunctively to prevent the over use or under use of the groundwater basin. Consequently, staff is very careful to recommend pricing for groundwater production charges, treated water charges, surface water charges and recycled water charges that work in concert to achieve the effective use of available resources.

This year's rate setting process is being conducted consistent with Board Resolutions 99-21 and 12-10. The rate setting process for both groundwater and surface water is consistent with Proposition 26 requirements that the groundwater production and surface water charges are no more than necessary to cover reasonable costs and bear a fair or reasonable relationship to the rate payor's burdens on or benefits received from the groundwater and surface water programs. The surface water charge setting process mirrors the process described in Proposition 218 for property-related fees for water services. As in the past, the Board will continue to hold public hearings and seek input from its advisory committees and the public before rendering a final decision on groundwater production and other water charges for FY 2025-26.

### **Staff Recommendations**

Exhibit 1 shows the recommended groundwater production charges and other charges for FY 2025-26.

### Exhibit 1 Summary of Charges (Dollars Per Acre Foot, \$/AF)

# Summary of Groundwater Production and Other Water Charges

Note: The total surface water charge is the sum of the basic user charge (which equals the groundwater production charge) plus the water master charge

\*\*Note: The total treated water contract charge is the sum of the basic user charge (which equals the groundwater production charge) plus the contract surcharge \*\*\*Note: The total treated water non-contract charge is the sum of the basic user charge (which equals the groundwater production charge) plus the non-contract surcharge Staff proposes a 9.9% increase in the North County Zone W-2 Municipal and Industrial groundwater production charge from \$2,229.00 per acre foot (AF) to \$2,450.00/AF. Staff recommends maintaining the treated water surcharge on treated water delivered under the contracts with retail agencies at \$115.00/AF, and maintaining the non-contract treated water surcharge at \$200.00/AF. The proposal equates to a monthly bill increase for the average household of \$7.60 or about 25 cents a day.

In the South County Zone W-5, staff proposes a 7.9% increase in the M&I groundwater production charge from \$579.00/AF to \$624.50/AF. The proposal equates to a monthly bill increase for the average household of \$1.58 or about 5 cents per day.

In the South County Zone W-7, staff proposes a 11.2% increase in the M&I groundwater production charge from \$750.50/AF to \$834.50/AF. The proposal equates to a monthly bill increase for the average household of \$2.89 or about 10 cents per day.

In the South County Zone W-8, staff proposes an 8% increase in the M&I groundwater production charge from \$430.00/AF to \$464.00/AF. The proposal equates to a monthly bill increase for the average household of \$1.18 or about 4 cents per day.

Customers in both areas of North and South County may also experience additional charge increases enacted by their retail water providers.

Staff proposes an 8% increase in the agricultural groundwater production charge, which would mean an increase from \$39.80/AF to \$43.00/AF. The proposed groundwater production charge equates to 9.25% of the lowest M&I rate (Zone W-8) and would translate to an increase of \$0.53 per month per acre, assuming 2 (two) acre-feet of water usage per acre per year.

Staff recommends a 9.9% increase to the surface water master charge from \$61.00/AF to \$67.00/AF to align revenues with the costs related to managing, operating and billing for surface water diversions. This increase results in a 9.9% increase in the overall North County municipal and industrial surface water charge, to \$2,517.00/AF. For South County, the overall increases in the basic user charge and surface water master charge result in a total surface water charge for M&I water as follows: \$691.50/AF, or an 8% increase for Zone W-5; \$901.50/AF, or an 11.1% increase for Zone W-7; and \$531.00/AF, or an 8.1% increase for Zone W-8. The total agricultural surface water charge in any zone represents up to a 9.1% increase at \$110.00/AF.

For recycled water, staff recommends increasing the M&I charge by 7.9% to \$604.50/AF. For agricultural recycled water, the proposed increase is 4.6% to \$73.35/AF. The increase maximizes cost recovery while concurrently providing an economic incentive to use recycled water. This pricing is consistent with the provisions of the "Wholesale-Retailer Agreement for Supply of Recycled Water Between Santa Clara Valley Water District and City of Gilroy." The proposed rate changes maximize cost recovery while concurrently providing an economic incentive to use recycled water.

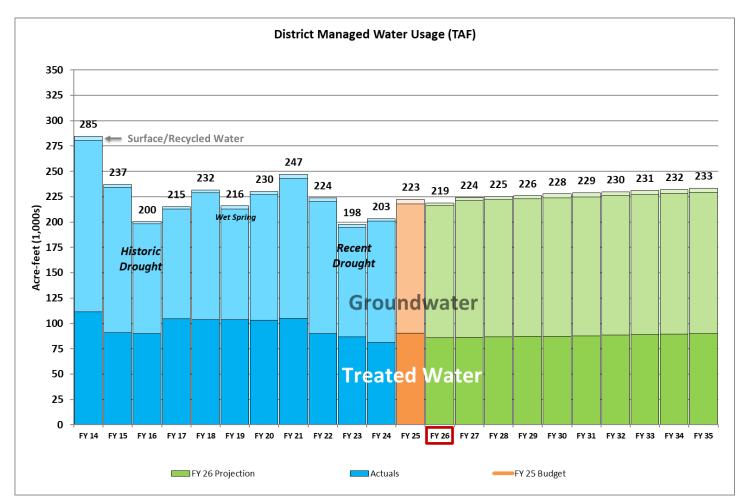

The proposed groundwater production charges for FY 2025-26 are necessary to pay ongoing operations and maintenance of the existing water utility system, investments in water supply infrastructure rehabilitation and upgrades, and new water supply reliability investments. Valley Water remains in an era of investment driven by infrastructure rehabilitation needs and climate change.

Staff recommends setting the State Water Project Tax at \$28 million for FY 2025-26. This translates to a property tax bill for the average single-family residence of roughly \$42.00 per year. Valley Water incurs an annual indebtedness to the State of California pursuant to its Water Supply Contract dated November 20, 1961. Such indebtedness is proportional to Valley Water's allocation of water from the State Water Project and pays for construction, maintenance and operation of state water project infrastructure and facilities. Staff anticipates that Valley Water's contractual indebtedness to the State Water Supply Contract for FY 2025-26 will be at least \$32.5 million. Staff's

recommendation regarding the State Water Project tax is consistent with Valley Water's past practice and with the approach of other water districts and agencies that maintain State Water Project supply contracts.

### **Projections**

Exhibit 2 shows actual and projected District-managed water use. Water usage in FY 2023-24 was estimated at approximately 203,400 AF, which is roughly 4,000 AF lower than budgeted. For the current year, FY 2024-25, water use was budgeted at 222,400 AF, which reflected ongoing rebound from the recent drought. Rebound has not been as robust as anticipated, and for FY 2025-26, staff is projecting water usage of 219,000 AF which reflects a slight reduction when compared to the budgeted amount for FY 2024-25.

### Exhibit 2 District-managed Water Use Projection (1,000's AF)

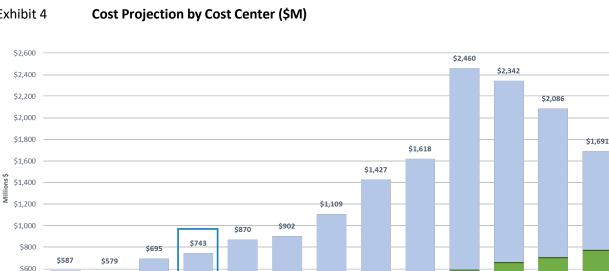

Exhibit 3 shows key financial indicators with staff's recommendation projected to FY 2030-31. The debt service coverage ratio, which is a ratio of revenue less operations expenses divided by annual debt service, is targeted at 2.0 or better which helps to ensure financial stability and continued high credit ratings keeping cost to borrow low.

			-				

A significant portion of the projected increases in the groundwater production charge are driven by the capital improvement program as shown in Exhibit 4. Around \$9.8 billion in capital investments are planned for the next 10 years. Approximately \$1.7 billion is projected to be spent on the Anderson Dam Seismic Retrofit, which would improve public safety and restore operational capacity. Climate change has brought the need for new infrastructure investments. Planning work continues on efforts to build local storage through the Pacheco Reservoir Expansion Project and to expand the purified water program, which would provide new drought proof water supply. The Water Supply Master Plan 2050 that is nearly finished will shed more light on what infrastructure investments are recommended. The remaining portion of the capital program is primarily dedicated to asset management of Water Utility Enterprise facilities throughout the county.

Over the next 10 years, operating outlays are projected to increase an average of 4.7% per year driven by: 1) the ramp up of payments associated with both the Delta Conveyance Project; and 2) the inclusion of the new B.F. Sisk Dam Raise Project at San Luis Reservoir. Operations cost increases are also driven by inflation including cost increases associated with employee salaries and benefits. Debt service is projected to rise from \$98.5 million in FY 2025-26 to \$329 million in FY 2034-35 as a result of periodic debt issuances to fund the capital program.

2. MWD, SDCWA and Zone 7 rates based on calendar year (i.e., 2025 rate would be effective on 1/1/2025)

3. SFPUC rate includes BAWSCA bond surcharge

Exhibit 7 shows a comparison of the average monthly bill for several of Valley Water's retail customers (e.g., San Jose Water Company, City of Santa Clara, City of Morgan Hill, and City of Gilroy) relative to Valley Water's perennial list of retail agency comparators across the state. SCVWD retailer rates shown include the staff recommended increase for FY 2025-26. North County and South County well owner rates are also shown, which exclude pumping costs (e.g., electricity) and well maintenance costs.

# Exhibit 7 Retail Agency Benchmarks

### **Cost of Service**

The cost-of-service analyses for FY 2025-26 are shown in Exhibit 8 for North County and Exhibit 9 for South County. The exhibits are laid out in a format that follows six industry standard rate making steps.

- 1. Identify utility pricing objectives and constraints
- 2. Identify revenue requirements
- 3. Allocate costs to customer classes
- 4. Reduce costs by revenue offsets or non-rate related funding sources
- 5. Develop unit costs by customer class or net revenue requirements by customer class
- 6. Develop unit rates by customer class

Water Utility pricing objectives and constraints representing rate making step 1 are identified in Resolution 99-21, the District Act, Proposition 218, Proposition 26, and existing contracts.

Step 2 includes identifying and segregating Water Utility Fund costs from Watershed and Administrative Funds and allocating Water Utility costs between zones W-2 (North County) and W-5, W-7, and W-8 (South County) according to benefits provided in each zone. Step 3 involves allocating costs by customer class either directly or based on water usage. Steps 4 and 5 result in unit costs by customer class after applying non-rate related offsets.

Step 6 includes two adjustments. The first adjustment is the application of 1% ad valorem property taxes, to offset the costs of agricultural water in accordance with Board Resolution 99- 21, also known as the "Open Space Credit." For FY 2025-26, staff is not proposing a transfer of 1% ad valorem property taxes from the General Fund and the Watershed Stream Stewardship Fund into the Water Utility Fund due to true-up adjustments related to FY 2022-23, which have reduced the amount of Open Space Credit needed in FY 2025-26.

The second adjustment involves reallocating a portion of the cost of treated water (or recycled water in the case of South County) to groundwater and surface water users. Treated and recycled water offsets the need to pump groundwater and therefore increases the volume of stored groundwater and improves reliability. The reallocation of a portion of the treated water cost for example represents the value of treated water to groundwater and surface water users and facilitates a pricing structure that prevents the over use of the groundwater basin. Preventing over use not only preserves groundwater for use in times of drought, but also prevents land subsidence or sinking of the land, which can cause serious infrastructure issues.

Another aspect of the second adjustment is related to setting the basic user charge for surface water equal to the groundwater production charge. Surface water use is effectively in-lieu groundwater use permitted by Valley Water to help preserve the groundwater basin. As such, the costs related to preserving the groundwater basin provide value to surface water users because it makes available District surface water, which otherwise would only be used for groundwater recharge. Similarly, the costs related to providing surface water benefit groundwater users because surface water usage helps preserve the groundwater basin. The second adjustment reallocates costs between surface water and groundwater customers in order to set the basic user charge for surface water equal to the groundwater production charge in recognition of this conjunctive use relationship, and in accordance with board policy. A 2015 study was conducted by Raftelis Financial Consultants, Inc (RFC) that confirms the reasonableness of such an adjustment. The report titled "Report Documenting the Reasonableness of the Conjunctive Use Benefit of Surface Water and Recycled Water to Groundwater Customers" documents the support and justification for the water district's cost of service methodology and can be found on Valley Water's website.

### **Open Space Credit**

The District Act limits agricultural groundwater production charges to a maximum of 25% of the M&I groundwater production charges. Current board policy adds an "open space" credit to agricultural revenues. The purpose of the credit is to preserve the open space benefits provided by agricultural lands by keeping agricultural groundwater production charges low. While the Supreme Court found Proposition 218 inapplicable to groundwater production charges, the Court determined that Proposition 26 does apply, which means that in order for the groundwater production charge to qualify as a nontax fee, costs to end users must be proportional such that one class of users is not subsidizing another.

The agricultural community currently benefits from low groundwater charges that are 1.8% of M&I charges in North County Zone W-2, 6.9% of M&I charges in South County Zone W-5, and 5.2% of M&I charges in South County Zone W-7. The current FY 2024-25 agricultural groundwater production charge is \$39.80/AF, or 9.25% of the South County Zone W-8 M&I charge of \$430/AF. The FY 2025-26 proposed agricultural groundwater production charge is 9.25% of M&I for Zone W-8, or an increase from \$39.80/AF in FY 2024-25 to \$43.00/AF in FY 2025-26, translating to an increase of up to \$0.53 per month per acre, assuming 2 (two) acre-feet of water usage per acre per year.

The credit to agricultural water users has become known as an "Open Space Credit." It is paid for by fungible, non-rate related revenue. To offset lost revenue that results from the difference between the adopted agricultural groundwater production charge and the agricultural charge that would have resulted at the full cost of service, Valley Water redirects a portion of the 1% ad valorem property taxes generated in the Water Utility, General and Watershed Stream Stewardship Funds.

To comply with the current agricultural groundwater production charge setting policy, staff recommends the open space credit received by South County be \$9.6 million in FY 2025-26 (funded by 1% ad valorem property taxes). This incorporates an adjustment that reconciles FY 2022-23 actuals against what was projected for that year. The \$9.6 million is comprised of a \$7.4 million transfer from North County Water Utility 1% ad valorem property taxes, a \$2.2 million contribution from South County Water Utility 1% ad valorem property taxes. As shown in Exhibit 10, the Open Space Credit is projected to grow to \$31.0 million by FY 2034-35.

### Exhibit 10 **Open Space Credit Trend**

Staff Report – FY 2025-26 Groundwater Production and Other Water Charges

### **Hearings and Meetings Schedule**

Exhibit 11 presents the schedule for the annual groundwater production charge setting process.

### Exhibit 11 Hearings and Meetings Schedule – 2025

Date	Hearing/Meeting
January 7	Agricultural Water Advisory Committee Meeting
January 14	Board Meeting: Preliminary Groundwater Charge Analysis
January 15	Water Retailers Meeting: Preliminary Groundwater Charge Analysis
January 22	Water Commission Meeting: Prelim Groundwater Charge Analysis
February 13	Board Meeting: Set time and place of Public Hearing
February 28	Mail notice of public hearing and file PAWS report
March 11	Board Meeting: Budget development update
March 19	Water Retailers Meeting: FY 26 Groundwater Charge Recommendation
April 7	Agricultural Water Advisory Committee Meeting
April 8	Open Public Hearing
April 9	Water Commission Meeting
April 23-24	Board Meeting: Budget work study session
April 25	Continue Public Hearing (Informational Open House with South County focus) *
May 16	Conclude Public Hearing *
May 27	Adopt Biennial Budget & Groundwater Production and Other Water Charges

\* Rescheduled and pending Board approval at time of publication.

SAN JOSE WATER COMPANY ADVICE LETTER NO. 616 ATTACHMENT B PUBLIC NOTICE FOR SUPPLY OFFSET

Para más información en cómo este cambio impactará su factura, llame al (408) 279-7900.

### NOTICE OF ADVICE LETTER FILING SAN JOSE WATER COMPANY'S FILING TO INCREASE WATER RATES ADVICE LETTER 616

Effective July 1, 2025, Valley Water, the wholesale water supply agency to San Jose Water Company (SJWC), will increase rates for purchased water and groundwater extraction fees charged to SJWC. If the CPUC approves this advice letter, effective July 1, 2025, rates will be recalculated to reflect actual water consumption in 2025. This will increase your bill.

### Why is SJWC requesting this increase?

SJWC pays fees to pump groundwater and to purchase treated water from Valley Water. On May 27, 2025, Valley Water voted to increase wholesale water charges by \$221 per acre-foot of water effective July 1, 2025, through June 30, 2026. SJWC purchases over 90% of its water supply from Valley Water and delivers it to homes and businesses. The cost of this water supply is passed through to customers at cost. SJWC is filing Advice Letter 616 to recover the pass-through increase.

### How could this affect my water bill?

If SJWC's rate request is approved by the CPUC, the monthly bill for the typical residential customer with a 3/4-inch meter using 10 Ccf (1 Ccf = 748 gallons) per month would increase starting July 1, 2025, by approximately \$4.90 (or 3.76%) from \$130.28 at present rates to \$135.18. This amount will be reflected on customers' bills through the quantity charges as shown below. A comparison of the current and the proposed quantity rate changes and monthly service charge changes are as follows:

### **Quantity Rate Changes**

Tariff Schedules No. 1. General Metered Service, Schedule No. 1B General Metered Service with Fire Sprinkler System and Schedule No. 1C General Metered Service, Mountain District

	Current Quantity	Proposed Quantity
	Rate Per Ccf	Rate Per Ccf
Residential Customers		
Tier 1: For Monthly Usage from 0-6 Ccf	\$4.4270	\$4.6022
Tier 2: For Monthly Usage from 6-12 Ccf	\$6.6074	\$6.8690
Tier 3: For Monthly Usage over 12 Ccf	\$12.6201	\$13.1198
All Other Customers		
Quantity Rate	\$6.6074	\$6.8690

### Tariff Schedule RW - Raw Water Metered Service

Current Quantity Rate	Proposed Quantity Rate
per Ccf	per Ccf
\$6.3434	\$6.6050

Tariff Schedule RCW - Recycled Water Metered Service

Current Quantity Rate	Proposed Quantity Rate
per Ccf	per Ccf
\$6.1023	\$6.3639

### **Monthly Service Charge Changes**

Current and Proposed Monthly service charge Increase by Meter size

		July 1, 2025		
Meter Size	Current Rates	Rates	\$ Increase	% Increase
5/8 x 3/4-inch	\$70.11	\$72.88	\$2.77	3.95%
3/4-inch	\$70.11	\$72.88	\$2.77	3.95%
1-inch	\$116.85	\$121.49	\$4.64	3.97%
1 1/2-inch	\$233.70	\$242.97	\$9.27	3.97%
2-inch	\$373.92	\$388.76	\$14.84	3.97%
3-inch	\$701.11	\$728.93	\$27.82	3.97%
4-inch	\$1,168.51	\$1,214.88	\$46.37	3.97%
6-inch	\$2,337.02	\$2,429.76	\$92.74	3.97%
8-inch	\$3,739.23	\$3,887.61	\$148.38	3.97%
10-inch	\$5,375.14	\$5,588.43	\$213.29	3.97%

### How does the rest of this process work?

This advice letter will be reviewed by staff in the Water Division of the CPUC. They will determine if the request is reasonable or if modifications are necessary.

### **Protests and Responses to Advice Letter 616**

Please include "Advice Letter 616" in any response or protest you submit. Protests must be made by June 9, 2025.

The reasons for the protest can be one of the following:

- 1) The utility did not properly serve or give notice of the advice letter;
- 2) The relief requested in the advice letter would violate statute or CPUC order, or is not authorized by statute or CPUC order on which the utility relies;
- 3) The analysis, calculations, or data in the advice letter contain material error or omissions;
- 4) The relief requested in the advice letter is pending before the CPUC in a formal proceeding;
- 5) The relief requested in the advice letter requires consideration in a formal hearing, or is otherwise inappropriate for the advice letter process; or
- 6) The relief requested in the advice letter is unjust, unreasonable, or discriminatory (provided that such a protest may not be made where it would require re-litigating a prior order of the CPUC).

If you would like to submit a protest or response about this advice letter, please write to:

California Public Utilities Commission Water Division, 3rd Floor 505 Van Ness Avenue, San Francisco, CA 94102 Email: Water.Division@cpuc.ca.gov

On the same date the response or protest is submitted to the Water Division, the respondent or protestant shall send a copy by mail (or e-mail) to SJWC at the following address:

San Jose Water Company Attn: Regulatory Affairs 110 W. Taylor Street San Jose, CA 95110 regulatoryaffairs@sjwater.com

### Where can I get more information?

Customers with internet access may view and download SJWC's advice letter on its website by visiting www.sjwater.com/filings-cpuc. If you have technical issues accessing the documents through the website, please e-mail regulatoryaffairs@sjwater.com for assistance and reference Advice Letter 616 in your e-mail.

To request a hard copy of SJWC's advice letter, or to obtain more information about the advice letter from SJWC, please write to:

San Jose Water Company Attention: Regulatory Affairs Advice Letter 609 110 W. Taylor Street San Jose, CA 95110 regulatoryaffairs@sjwater.com
